Your views needed

As an organisation we will be submitting evidence to **NICE (National Institute for Health and Care Excellence)** for the Single Technology Appraisal (STA) of **dimethyl fumarate** for treating moderate to severe plaque psoriasis and would like you to provide your views and any experiences you have had with these and any other treatments. This could also be as a carer's point of view of someone with the condition.

It is important for us to provide views that reflect the real world of living with the condition, and any advantages and disadvantages of current treatments and newer drugs.

This Time Next Year

TwoFour production company are currently making a second series of recent global success This Time Next Year with Davina McCall for ITV.

The series follows ordinary people making a pledge to the nation about what they would like to achieve by this time next year.

They then follow their journey throughout the year as they progress towards their goal and hopefully fulfil their ambition. It's a simple format idea, yet produces some inspiring human stories.

If you are interested to learn more or need more information contact Astrid Bunbury Assistant Producer at TwoFour.
