

## SnB#58 - Out now!

Developing any condition can be a worry; is that small patch of irritated skin a passing problem? Or something of greater concern?

For most people the former is most likely, but if it's psoriasis, then the story is more complicated. Once believed to be just an external problem, which will resolve with some cream, the psoriatic picture is now much bigger.

You can explore these questions, in issue 58 of our Skin 'n' Bones Connection journal, which is available to download as a digital copy or as a print version from our shop now.
